

SHOPEE SELLER CASE STUDY

INTRODUCTION

A leading food and seasoning product was established in 1958. Through the years, the company was able to grow its local business as more of their products find their way to Filipino households. The company's mission is to contribute to food and wellness, and to better lives for the future.

The company's complete line of quality food and seasoning products are produced from its own factories and by international affiliates and local toll manufacturers using the company's license, quality standards and technological expertise.

The company is directly servicing supermarkets, wholesalers, public markets and the food service industry and has established sales and support services with its industrial customers as supplier of raw materials, particularly ingredients for processed foods, animal nutrition and pharmaceutical products.

GMV (\$B)

The digital decade continues its upward trend at 20% YoY to reach \$20B this year, with e-commerce propelling it to \$35B by 2025.

OPERATIONAL CHALLENGES:

- No KPI was set and lack of EC Strategy and direction.
- Lack of process in defining the challenges.
- Lack of tests to assess existing initiatives.

SHOPEE PLATFORM CHALLENGES

- Low GMV and CVR during normal days (non-sale events)
- Promotional activities during sale events were not attractive enough to get more sales
- Some SKU's did not fare well on search campaigns (both auto and manual) during sale campaigns
- ROAS is usually low and just reaches the target slightly
- Spending is too low and while it led to high ROAS, it gives more room to efficiently spend the budget to get more visitors.

CLIENT'S CHALLENGES

SOLUTIONS

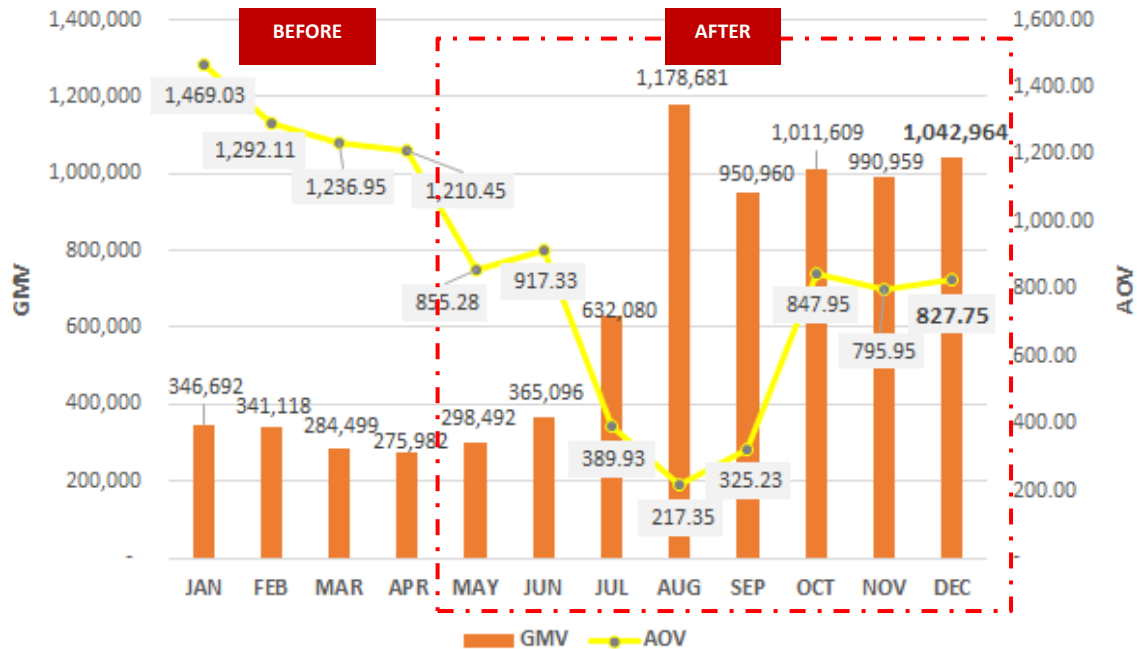

OPERATIONAL SOLUTIONS:

- Develop EC strategy and operation directives (KPIs) and manage the partner by agreed KPIs.
- Implement Plan, Do, Act, Check (PDCA) cycle as a culture.
- Accumulate knowledge by trial and error.

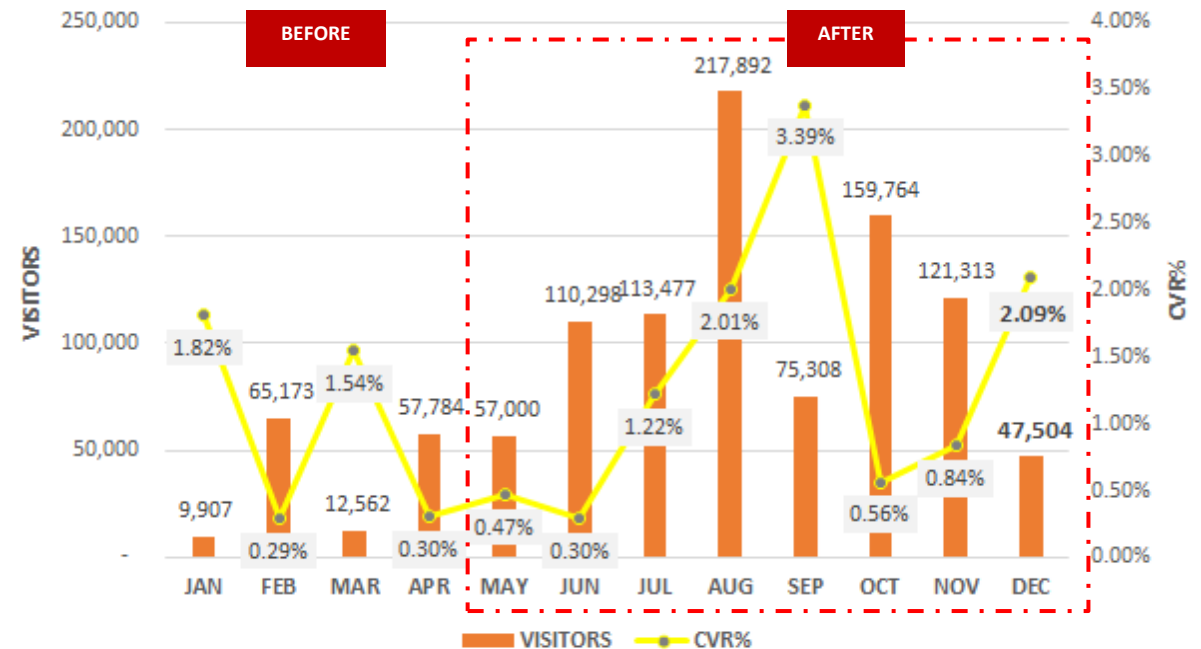

SHOPEE PLATFORM SOLUTION

- To improve the KPIs set, deep analysis on the raw data is needed to be able to understand the weakness of the marketing efforts. Data driven analysis and recommendation has played a huge part in improving the performance of the products in all e-Commerce platform.
- A dedicated team composed of Digital Marketing Strategist, Data Analyst, Digital Marketing Lead, and E-Commerce Manager has been built to fully translate the raw data into actionable items that will result to positive and desired outcome.

2023 GMV & AOV TRENDS

2023 VISITORS & CVR% TRENDS

RESULT

Project Banso was tested from May to June 2023 and was officially launched July 2023. Since then, the KPI targets grew significantly compared to the months of Jan – Apr of 2023. The numbers has more than doubled compared to year 2022 of the same period when PROJECT BANSO was launched.

As you can see from the graph, the revenue (GMV) has performed really well and made the client really happy with the performance of their e-Commerce stores with the support of TCAP’s BANSO SUPPORT.

“The success of our client is our success.”

** Banso is a Japanese word meaning “accompaniment”*
